

## Hiffex®

**Hiffex** is a brand that is used for a range of Polyamide/Cotton blend articles.

Among the main differences shown by HIFFEX fabrics are their quick drying feature and strength that is 100% greater than a similar cotton product.

The cotton component gives the fabric a natural look, the Polyamide strengthens the fibre and Elastane adds a touch of comfort and softness. Like many other synthetic materials, stretch fabric is easy to care for. It is hard-wearing and appreciated for its great comfort.
